

underwater robots: motion and force control - underwater robots: motion and force control of vehicle-manipulator systems, g. antonelli, springer-verlag, berlin, germany, 2002. isbn 3-540-00054-2

underwater robots: motion and force control of vehicle ... - 138 ieee control systems magazine, october 2008

underwater robots: motion and force control of vehicle-manipulator systems by gianluca antonelli reviewed by **lncs 0002 - underwater robots** 2nd edition (frontmatter ... - gianlucaantonelli underwater robots motion and force control of vehicle-manipulator systems second edition with 95 figures

approximated generalized torques by the hydrodynamic ... - dynamic characteristics between on-land and underwater robots. drag and lift forces acting on the underwater link are described as a function of the relative velocity of the link with respect to the fluid using the strip theory. using the translational velocity of the link as the rotational velocity of the joint, we describe the drag force as a function of joint variables. generalized drag ...

motion planning and contact control for a tele-assisted ... - finally, the use of distributed motion planning and sequential position/force control of a slingsby ta-9 hydraulic underwater manipulator is described, to implement an atomic action for tele-assistance.

unified motion planning method using random network and ... - task, and the other is a thrust force generation task. keywords: multifunctional underwater robots, unified motion planning, dynamic programming, gradient method, random network

repetitive periodic motion planning and directional drag ... - repetitive periodic motion planning and directional drag optimization of underwater articulated robotic arms bong-huan jun, jihong lee, and pan-mook lee abstract: in order to utilize hydrodynamic drag force on articulated robots moving in an underwater environment, an optimum motion planning procedure is proposed. the drag force acting on cylindrical underwater arms is modeled and a ...

the underwater motion simulation of a spherical amphibious ... - the underwater motion simulation of a spherical amphibious robot xu ma 1, ... underwater robots play a vital role in the ocean research such as marine environment monitoring, experimentation and other implementation of underwater tasks [1]. the spherical robot, as a kind of underwater robot, because of its unique shape has many excellent properties and also more and more gets the welcome of ...

unified motion planning method using random network and ... - reaching task and thrust force generation task

5. conclusions. 3. outline of presentation outline of presentation 1. introduction background and objectives 2. formulation motion planning problems for multifunctional underwater robots 3. approach unified motion planning method using random network and gradient method 4. experiments reaching task and thrust force generation task 5. conclusions. 4 ...

hydrodynamic analysis of the spherical underwater robot sur-ii - proposed to describe the relationship between force and ... objects, spherical robots can perform a rotational motion with a 0 turn radius. many types of spherical underwater robots have been ...

research on the dynamic vibration control of underwater robot - moreover, when the underwater robot is immersed in the water completely, the buoyancy force of the water applied on the underwater robot is 16n larger than its

modeling of underwater snake robots moving in a vertical ... - modeling of underwater snake robots moving in a vertical plane in 3d e. kelasidi, k. y. pettersen and j. t. gravdahl abstract increasing efficiency by improving the locomotion

book review - niscair - indian journal of geo-marine sciences vol. 40(2), april 2011, pp. 296-298 book review underwater robots: motion and force control of vehicle-manipulator systems.

performance evaluation of a novel propulsion system for ... - underwater robots [5]. in our previous study, firstly a spherical underwater robot with multi vectored in our previous study, firstly a spherical underwater robot with multi vectored water-jet thrusters was developed [6,7].
